Exit Awards	PG Cert
School	Bayes Business School
Department or equivalent	Specialist Masters Programme
Programme code	PSIAFM
Type of study	Full Time
Total UK credits	180
Total ECTS	90
Mode of learning	In person

### PROGRAMME SUMMARY

The MSc in International Accounting & Finance with Management provides you with expertise that combines accounting and finance knowledge with the up-to-date managerial skills necessary to deal with complex business challenges. The course is cross-disciplinary and balances rigorous accounting and finance analytical tools with transferable managerial knowledge that promotes entrepreneurial mindset and a holistic appreciation of the full business cycle.

Throughout the course, where possible, lecturers will emphasise the many ethical issues that arise in the context of accounting and a wider business practice. In so doing you will be encouraged to share your views with your lecturers and with your class mates, where a diversity of opinion is to be expected and encouraged.

The MSc in International Accounting and Finance with Management is designed to allow for intellectual progression through modules taught in terms one and two. Modules taught in term two build on the knowledge and skills acquired in term one. Term three provides further progression by choosing specialist elective modules and a project where students can apply knowledge and skills acquired earlier in the programme.

Term 1 consists of four compulsory modules which encompass a range of fundamental knowledge and key skills related to accounting, finance, strategy and marketing areas.

Term 2 offers two compulsory modules and also a choice of two modules from a list of four options which allows for a more individualised course of study. You will have the opportunity to deepen your knowledge across a set of specialisation areas including entrepreneurship, supply chain management, international marketing and international business finance.

Term 3 will offer five optional routes and you will be able to customise your own areas of study, choose from a broad range of modules specially designed to allow you to have a direct practical experience of specialist subjects and/or apply your knowledge and deepen your research skills by opting for a research project.

Throughout your degree, you will integrate your learning across a range of professional skills, delivered in a highly targeted and applied format. These skills are aimed at helping you develop your aspirations, plan your approach to your job search and help you create a strong base from which to manage your career long term. You will also be able to use the skills you learn to support your wider study, substantiate your arguments and make informed assessments about the material you are covering.

### Aims

- To provide a high quality education for individuals seeking a comprehensive understanding of accounting and modern management methods.
- To provide you with a thorough understanding of the conceptual foundations of accounting, finance and management, and of the relevance of these in an applied context.
- To focus on the international context in view of the increased globalisation of accounting standards, integration of capital markets and their implications on international business practices.
- To provide you with a focus on the wider business and strategic setting of accounting and management decision-making.
- To demonstrate the relevance and applicability of academic research sufficient to enable you to make informed and objective decisions in a wide range of situations.

### Registration Period

It is expected that you will complete this degree within 12 months. The maximum period of registration for the degree is three years full time.

### **WHAT WILL I BE EXPECTED TO ACHIEVE?**

**On successful completion of this programme, you will be expected to be able to:**

#### Knowledge and understanding

- Explain and apply the theories underlying current thinking in accounting, finance, and management and how these are synthetically related.
- Critically assess how these theories can be applied in practical contexts and establish a sound foundation knowledge upon which to build your career across wide areas of business.
- Apply multi-dimensional business knowledge that blends accounting and finance fluency with the up-to-date strategy, marketing and management tools necessary for creating the business knowledge value chain.

#### Skills

- Develop practical, analytical and decision-making skills in the fields of accounting, finance and management.
- Apply knowledge and understanding to complex issues, so that theory is converted into practice from a critical and informed perspective, thereby enhancing organisational effectiveness and competitiveness.
- Communicate effectively using the full range of media (including listening and presenting), working both individually and in groups / teams.
- Develop an enhanced personal skillset to include persistence, problem solving, creativity, team-working, communication skills, leadership, initiative and business focus.
- Undertake independent research projects in the subject area and prepare a dissertation which argues their case in a convincing way and incorporates insights from the relevant literature appropriately.
- Use relevant IT and consulting skills, which will deepen understanding of the business context within which business decision-making takes place.
- Debate the implications of current accounting, finance and management theory for practical issues.
- Identify relevant information from a large array of business data.

### Values and attitudes

- Show critical awareness and understanding of ethical issues in financial reporting and across different aspects of management and leadership related dilemmas.
- Appreciate the need to balance ethical and economic objectives in evaluating business decisions.

### **Graduate Attributes**

The graduate attributes you can demonstrate on completion of your programme are key to your future employment. It is therefore central to every programme that there will be opportunities in the learning, teaching and assessment activities for you to engage with these on all modules. Further detail of this will be provided for you by your module leader. The graduate attributes are:

- Always learning
- Engaged in the world
- Technical and digital
- Connected Professional

### **HOW WILL I LEARN?**

Teaching and learning methods include the opportunity for you to apply your knowledge and expertise to problems beyond those generally encountered. A range of teaching and learning strategies are used to help you meet the different learning outcomes and to cater for the varied backgrounds and experiences of you and your fellow students.

- Lectures and directed reading are used to help you achieve an understanding of the current level of knowledge in the relevant areas.
- Case studies, the use of specialist software package and real life exercises as well as contributions from outside speakers are used to achieve integration between theory and practice.
- Substantial pieces of individual work such as a Research Project will provide you with the opportunity to acquire research and report writing skills on an individual basis and you will also work in small groups with your fellow students in order to benefit from peer interaction.
- Classes are supported by e-learning material which is available on the Moodle Virtual Learning Network.

The assessment of the course will also support your learning:

- Coursework provides ongoing feedback on your programme.
- Tests will assess the knowledge gained.
- Examinations provide a more in-depth assessment of knowledge gained and also assess your problem solving abilities.

The MSc in International Accounting and Finance with Management is designed and structured to allow for intellectual progression through modules taught in terms 1 and 2. Modules taught in term 2 normally build on the knowledge and skill acquired in term 1. Term three allows for further progression by choosing specialist elective modules or a dissertation/project, where students can apply knowledge and skills acquired earlier in the programme.

A minimum of 10 learning and teaching hours (both contact and non-contact) are required for each credit awarded. The precise weighting of different types of learning and teaching depends on the modules you take and the breakdown is therefore provided within the appropriate module specifications.

Non-contact hours are for self-directed study and account for the **indicative** amount of time you should spend studying independently, including subject research, reading, working in groups and completing assignments and other homework.

**Overall teaching and learning hours: approx 1800 hours**

**Contact hours: approx 348 hours**

## **WHAT TYPES OF ASSESSMENT AND FEEDBACK CAN I EXPECT?**

### Assessment and Assessment Criteria

This course is assessed by coursework and examinations and applies standard MSc grade related criteria.

Assessment Criteria are descriptions, based on the intended learning outcomes, of the skills, knowledge or attitudes that you need to demonstrate in order to complete an assessment successfully, providing a mechanism by which the quality of an assessment can be measured. Grade-Related Criteria are descriptions of the level of skills, knowledge or attributes that you need to demonstrate in order to achieve a certain grade or mark in an assessment, providing a mechanism by which the quality of an assessment can be measured and placed within the overall set of marks. Assessment Criteria and Grade-Related Criteria will be made available to you to support you in completing assessments. These may be provided in programme handbooks, module specifications, on the virtual learning environment or attached to a specific assessment task.

### Feedback on assessment

Feedback will be provided in line with our Assessment and Feedback Policy and will be provided in a variety of ways throughout your course, both formally and informally, in order to support your learning.

You will normally be provided with coursework feedback within three weeks of the submission deadline or assessment date. This would normally include a provisional grade or mark. The timescale for feedback on final projects or dissertations may be longer. Examination grades will be provided once they have been agreed by an Assessment Board.

More details about the feedback you can expect from individual modules and assessments will be provided by your lecturers.

The full policy can be found at: [assessment regulations and policy](#).

### Assessment Regulations

In order to pass your Programme, you should complete successfully or be exempted from the relevant modules and assessments and will therefore acquire the required number of credits. The programme is weighted according to the number of credits awarded for each module. Pass / Fail modules are excluded from this calculation.

The pass mark for each module is 50% and there are no minimum qualifying marks for individual components.

If you fail an assessment component or a module, the following will apply:

#### **1. Re-Sit:**

You will normally be offered one re-sit attempt.

If you are successful in the re-sit, you will be awarded the credit for that module. The mark for each assessment component that is subject to a re-sit will be capped at the pass mark for the module. This capped mark will be used in the calculation of the final module mark together with the original marks for the component(s) that you passed at first attempt.

#### **2. Compensation:**

Compensation can only be awarded by the Final Assessment Board and must be applied within the following limits and conditions:

Where you fail up to a total of 30 credits (15 for a postgraduate certificate), you may be eligible for compensation if:

- Compensation is permitted for the module involved (see the “What will I Study” section of the programme specification), and

- It can be demonstrated that you have satisfied all the Learning Outcomes of the modules in the Programme, and
- A minimum overall mark of no more than 10% below the module pass mark has been achieved in the module to be compensated, and
- An aggregate mark of 50% has been achieved overall.

If you receive a compensated pass in a module you will be awarded the credit for that module. The original component marks will be retained in the record of marks and your original mark shall be used for the purpose of your award calculation.

If, at the point where you have results for all taught modules:

- You have no more than 30 credits outstanding (15 for a PG Certificate), and
- The grade for this module(s) is 40% or above, and
- Your overall degree average is at least 50%, and
- If the module(s) is eligible for compensation.

Then you will **not** be required to undertake the re-sit for that module, as this will be eligible for compensation.

**Please note:**

- **If you fail more than 30 credits (excluding project modules), then you must retake all outstanding assessments with no exceptions.**

If you do not meet the pass requirements for a module and do not complete your re-sit by the date specified you will not progress and the Assessment Board will require that you be withdrawn from the programme.

If you fail to meet the requirements for the Programme, the Assessment Board will consider whether you are eligible for an Exit Award as per the table below.

If you would like to know more about the way in which assessment works at City St George's, please see the full version of the [Assessment Regulations](#).

## **WHAT AWARD CAN I GET?**

### Master's Degree:

Following successful completion of the MSc in International Accounting and Finance with Management, you will have the ability to assess and evaluate all aspects of Accounting and Finance and apply your learning in the appropriate context. You will also have demonstrated the capacity to undertake business research from an analytical perspective.

	<b>HE Level</b>	<b>Credits</b>	<b>Weighting (%)</b>
Taught	7	180	100

<b>Class</b>	<b>% required</b>
With Distinction	70
With Merit	65
Without Classification	50

Postgraduate Diploma:

Following the award of a Postgraduate Diploma in International Accounting and Finance with Management in addition to the below, you will gain a more advanced knowledge and in-depth understanding of these subject areas, from a variety of different perspectives and in order for you to broaden your expertise and skills. You will have developed a sophisticated appreciation of current theories and practice in Accounting and Finance together with the ability to evaluate a range of different approaches to them.

You must achieve 120 credits with a minimum mark of 50%.

	<b>HE Level</b>	<b>Credits</b>	<b>Weighting (%)</b>
Taught	7	120	100

<b>Class</b>	<b>% required</b>
With Distinction	70
With Merit	65
Without Classification	50

Postgraduate Certificate:

Following the award of a Postgraduate Certificate in International Accounting and Finance with Management you will be able to examine the theories related to all aspects of International Accounting and Finance and apply your learning in the appropriate context. You will possess the skills and knowledge required to develop a career in the Accounting and Finance arena, will have mastered essential skills and knowledge and also developed an appreciation of what it takes to engage with Accounting and Finance in context. The assessments you undertake to achieve this qualification will focus on the skills, knowledge and attributes that you will need to facilitate your career development and will support you in developing your practical abilities. The postgraduate certificate will enable you to gain confidence in your skills and your future role.

You must achieve 60 credits with a minimum mark of 50%.

	<b>HE Level</b>	<b>Credits</b>	<b>Weighting (%)</b>	<b>Class</b>	<b>% required</b>
Taught	7	60	100	With Distinction	70
				With Merit	65
				Without Classification	50

### WHAT WILL I STUDY?

The programme runs over three terms. In term 1 you are required to take four modules for a total of 60 credits (please refer to the table below for details). In term 2 you will complete two compulsory modules plus two options (from a choice of four) for a total of a further 60 credits. In term 3 you will have three options to acquire final 60 credits and complete the MSc:

**Option 1** - Elective study only: taking 5 x specialist electives of 10 credits each plus BBM109 Career Management Skills and Research Methods (10 credits).

**Option 2**- a combination of elective study (3 x 10 credits) and a General Research Project (1 x 30 credits)

**Option 3** - A Research Project with a value of 60 credits

Module Title	SITS Code	Module Credits	Compulsory / Elective	Can be Compensated?	Level
<b>Term One</b>					
Contemporary Issues in Corporate Finance and Investment Valuation	SMM469	15	Co	Y	7
Analytics for Accounting and Business	SMM466	15	Co	Y	7
Marketing and Strategy	SMM326	15	Co	Y	7

Negotiation Skills for Multidiscipline Managers	SMM299	10	E	Y	7
New Market Creation	SMM317	10	E	Y	7

During term three you will be able to choose from a range of electives to personalise your experience.

This list of electives is an indication of the range of modules that can be on offer and is subject to change due to circumstances such as: enhancing or updating the quality and content of educational provision; responding to student feedback; academic staffing changes; the number of students in each programme; a lack of student demand for certain modules; or factors beyond the institution's reasonable control, such as meeting the latest requirements of a commissioning or accrediting body. For these reasons, not all the electives listed will be offered every year. New (additional or replacement) modules may also be added for these reasons.

There may also be pre-requisites for joining a module, and space and timetable availability restrictions may also apply.

The list of electives offered in a given year will be confirmed by February 1st.

### **TO WHAT KIND OF CAREER MIGHT I GO ON?**

[Careers services | Bayes Business School](#) - Careers Service

[Alumni | Bayes Business School](#) - Alumni Service

### **WHAT PLACEMENT OPPORTUNITIES ARE AVAILABLE?**

- Placements are not part of the programme.

### **WILL I GET ANY PROFESSIONAL RECOGNITION?**

Accreditations for the course are available from a number of professional bodies, primarily:

- ACCA – Associate of Certified Chartered Accountants
- CIMA – Chartered Institute of Management Accountants
- ICAEW – Institute of Chartered Accountants for England and Wales

Please note that these change from time to time and the most up to date information is available on our website.

### **HOW DO I ENTER THE PROGRAMME?**

To be accepted on to a Bayes MSc degree you will need a good Bachelor's degree. This usually means a UK 2.1 or above, or the equivalent from an overseas institution. Some level of previous study in the specific subject area may be required.

Applicants will need to submit two references, one of which must be an academic reference if the candidate does not have previous work experience. Previous work experience is not a requirement of our full time MSc courses.

We require all students who have not previously studied at in English to take an IELTS exam. The IELTS requirement is 6.5 with a minimum of 6.0 in any section.

Version: 3.0

Version date: February 2024

For use from: 2025/26
