Full-time MBA

Class of 2024

[Always learning]

Welcome to the Full-time MBA

Programme summary

Our one-year intensive Full-time MBA is designed to develop your business skills and experience, providing you with the confidence, knowledge and networks to achieve your career ambitions. On this journey, you will be studying and collaborating alongside a talented international cohort of business professionals, each with their own fields of expertise. The MBA is a journey of exploration and professional transformation.

The Full-time MBA has four major components:

- Core modules are taken by all students and cover fundamental areas of business. As students progress through the MBA, they build up knowledge and skills that will be used throughout the programme and beyond.
- Our elective portfolio gives students the opportunity to tailor their MBA and focus on specific areas of business. The international electives build an understanding of global business through projects undertaken in Africa, Asia, Europe, Latin America, the Middle East and the USA.
- The Business Mastery Project is the final major project for the Full-time MBA. Students put into practice what they have learned on the programme by completing an extensive piece of consultative work for a company and provide recommendations or solutions to organisational challenges.
- The Careers and Professional Development team provide workshops and services aimed at developing vital soft skills such as networking, interviewing techniques, negotiation, advanced presentation and leadership transition. Students come away from these sessions better equipped to meet the challenges of business in a global economy.

Programme delivery

Students' understanding of theory is developed through a combination of case teaching, formal lectures, collaborative group work, seminars, discussions, workshops, self-study and projects. Professional skills modules typically involve experiential and immersive learning. In addition to this, students have access to a customised virtual learning environment. This includes interactive learning materials, academic support via Q&A and discussion forums.

Business network

The skills learnt and the qualification itself are just one part of the Full-time MBA; the contacts students make and the network built is the other. At Bayes Business School, we provide our students with the opportunity to build an effective business network that will continue to prove its value long after the programme is completed.

Programme start date

August
