ACADEMIC LEAD

Prof Pawel Bilinski

EXECUTIVE EDUCATION

Finance for Medical Professionals

Financial insight for better healthcare leadership.

Build confidence in using financial information to support service leadership, budgeting, investment decisions, and sustainable care delivery across healthcare settings.

Healthcare focused

No prior finance background required

A practical programme for clinicians, service leads, and healthcare professionals seeking stronger financial judgement in operational and strategic decisions.

WHO IT IS FOR

Designed for medical professionals

- Doctors and clinicians with leadership or management responsibilities
- Hospital consultants and clinical directors
- Healthcare administrators and service leads
- Private practitioners
- Medical professionals involved in budgets, planning, or organisational decision-making

WHY JOIN

Healthcare leaders are often asked to make decisions with financial consequences. This programme helps you interpret the information behind cost, investment, and sustainability with greater confidence.

OUTCOME

Use financial data with confidence

OUTCOME

Assess costs, risks and sustainability

Support smarter decisions about resource allocation, business cases, and service priorities.

Bayes Business School · City St George's, University of London

LEARNING OUTCOMES

What you will gain

- Understand the financial information used to assess the performance of practices, departments, and healthcare organisations
- Build confidence in using financial data to support planning and decision-making
- Recognise the relationship between cost, activity, investment, and sustainability in healthcare
- Distinguish clearly between profit, cash flow, and financial viability
- Contribute more effectively to discussions around budgeting, expansion, procurement, and operational priorities
- Evaluate financial risks and opportunities with greater confidence

HOW YOU WILL LEARN

Teaching is practical, applied, and highly interactive, using discussion, case-based teaching, exercises, and group work anchored in real healthcare challenges.

PROGRAMME STRUCTURE

Three focused parts

PART 1

Understanding financial information in healthcare
Learn how financial statements work, what key terms mean, and how to interpret information relevant to healthcare organisations and medical practice.

PART 2

Analysing performance and sustainability
Examine how revenue, cost structures, investment, and operational choices shape organisational outcomes and long-term sustainability.

PART 3

Making better financial decisions
Explore cost management, investment choices, and resource allocation, and learn how to assess trade-offs in a structured and informed way.

BENEFITS

Value for participants and organisations

FOR MEDICAL PROFESSIONALS

- Make better use of limited resources
- Understand the financial implications of operational and clinical choices
- Engage more confidently with finance teams, executives, insurers, and external stakeholders
- Support long-term resilience and sustainability in healthcare delivery

FOR HOSPITALS, CLINICS, AND PRACTICES

- Combine clinical understanding with stronger financial judgement
- Take a more informed approach to resource allocation and cost management
- Contribute to more robust business cases and investment decisions
- Work more effectively across clinical, operational, and financial teams
- Help align financial sustainability with patient care priorities
